Executive Summary
Economic and housing growth in the Ruckersville area has been largely due to its location at the intersection of U.S. Route 29 and U.S. Route 33. This major crossroads continues to influence the County and its growth patterns, as both routes are heavily used through traffic and commuter corridors within the greater region. Further, Ruckersville continues to develop due to its close proximity to the fast-growing communities in Albemarle and Charlottesville. Ruckersville residents have easy access to jobs and services located in the Hollymead Town Center, Stonefield, the City of Charlottesville and the University of Virginia, while avoiding a comparatively higher cost of living associated with Charlottesville and Albemarle. These factors result in a land use pattern that is dominated by highway-oriented commercial businesses surrounded by low-density residential development.

To confront Ruckersville’s opportunities and threats, Greene County decided to pursue a Small Area Plan for its fastest growing area, as a subsection of the County’s Comprehensive Plan. To develop this plan, the County and its project team developed a planning process founded on extensive community input, to ensure that the final plan was representative of the residents and businesses of Ruckersville. This community-driven planning approach included:

- Three public open houses, convened at key decision points in the planning process,
- Six meetings of a Ruckersville Advisory Panel,
- A surveying effort that reported over 450 responses,
- Online comments, and
- Other interactions with local businesses and residents

The Ruckersville Area Plan is a ten-year to-do list for Greene County officials and the Ruckersville community, including residents and businesses. As such, this living document should be regularly reviewed and updated, as items are completed. The Ruckersville Advisory Group will be responsible for ensuring accountability, by tracking progress on recommendations and following up with responsible parties. The Ruckersville Advisory Group should conduct an annual review of the recommendations, requesting that the County’s Planning Department (the point of contact for the Ruckersville Area Plan) submit any amendments or updates to the Board of Supervisors.

Development of the Ruckersville Area Plan is just the beginning to the overall effort. While the planning process is a critical step, it only makes up a small fraction of work to be done for the next ten years. For this planning process to have value, the County and Ruckersville community must be committed to a long-term and sustained process that includes public and private stakeholders.
Acknowledgements
This area plan was initiated by Greene County. While the Thomas Jefferson Planning District Commission facilitated this study, several other groups, especially the Ruckersville Advisory Panel, played a significant role in conducting this planning effort. The TJPDC would like to thank those who contributed their time, resources, and creativity to this process. The names and titles of those that participated throughout this process and served on the advisory panel can be found to the right.

INTRODUCTION
PURPOSE
Development of the Ruckersville Area Plan is just the beginning to the overall effort. This document serves as a plan, or to-do list, for moving forward with the various efforts, listed below. While the planning process is a critical step, it only makes up a small fraction of work to be done for the next ten years. For this planning process to have value, the County and Ruckersville community must be committed to a long-term and sustained process that includes public and private stakeholders.

FUNCTION OF THE PLAN
The Ruckersville Area Plan is a ten-year to-do list for Greene County officials and the Ruckersville community, including residents and businesses. As such, this living document should be regularly reviewed and updated as items are completed. The Ruckersville Advisory Group, detailed in the recommendations section under C-9, will be responsible for ensuring accountability, by tracking progress on recommendations and following up with responsible parties. The Ruckersville Advisory Group should conduct an annual review of the recommendations, requesting that the County’s Planning Department (the point of contact for the Ruckersville Area Plan) submit any amendments or updates to the Board of Supervisors.

BACKGROUND
The 2016 Greene County Comprehensive Plan identified a need to conduct this small area plan due to increasing concerns with traffic, especially along U.S. Route 29, and increasing development pressures as the Ruckersville area absorbs more of Greene’s commercial and residential growth. Further, the community expressed a desire to transform Ruckersville into a community-focused destination with a sense of place.

The resulting Ruckersville Area Plan is a community-based and community-focused plan built around addressing the current and future needs and desires of the Ruckersville community. The plan uses a ten-year planning timeframe and focuses on providing policy makers, local government officials, residents and the business community with a set of actionable recommendations. Recommendations included in Chapter 4 are developed from extensive public input and coordination with the work of the Ruckersville Advisory Panel.

PLANNING PROCESS
Advisory Panel
The Ruckersville Advisory Panel, consisting of members selected by Greene County’s Planning Staff, helped guide the Ruckersville planning process. Panel membership included: Ruckersville residents, business owners, local government staff, elected officials, planning commissioners, VDOT staff, and other subject matter experts. The Advisory Panel acted as the plan’s eyes and ears and provided guidance and insight to the planning team. The Advisory Panel met monthly for the duration of the planning process and discussed various planning topics at each meeting. A summary of each meeting is provided below:

- **Meeting #1 – September 8, 2017:** Planning process and background
- **Meeting #2 – October 13, 2017:** Public feedback
- **Meeting #3 – November 15, 2017:** Scenario Planning
- **Meeting #4 – January 22, 2018:** Visual preference survey results
- **Meeting #5 – February 16, 2018:** Plan outline and draft recommendations
- **Meeting #6 – March 16, 2018:** Final recommendations and results of the zoning audit

Planning Team
A separate planning team acted as project leads for Greene County, shepherding the process and providing technical guidance. This team included staff from the Greene County Planning Department, as well as the Tourism and Economic Development Department. The Thomas Jefferson Planning District Commission
Community Engagement
To ensure that the Ruckersville Area Plan reflected the Ruckersville community, the Planning Team deployed a community-driven planning process that included extensive public outreach and engagement. To ensure continued communication with the public at large, the planning process relied on the expertise of the Advisory Panel. Three public open houses featured presentations, interactive displays and contact with the Planning Team. Additional public outreach included a community-wide survey, sent to Ruckersville area residents and businesses.

Community Survey
The Planning Team circulated an extensive community survey early in the planning process. The survey was available online and in paper form and ran from September 2017 to October 2017. Responses totaled more than 450, with over 500 individual comments. The survey consisted of 14 preference type questions with space provided for narrative answers. Staff analyzed the survey results, which served as the foundation for the plan vision statement, goals and the plan recommendations. A detailed discussion of plan recommendations is included in Chapter 4. A copy of the survey summary report is included in the Appendix.

Open House Events
The Ruckersville planning process included three public open house events. The Planning Team scheduled these events around key decision points in the process. The open house events provided a way to achieve community buy-in, allowing residents and businesses to help direct the planning process.

- **Open House #1 - October 3, 2017**: Existing conditions
- **Open House #2 - December 6, 2017**: Conceptual framework and visual preference survey
- **Open House #3 - March 29, 2017**: Review of recommendations

Public Hearings and Work Sessions
The Greene County Planning Commission held a work session on April 18, 2018, to review the plan recommendations and provide final guidance on the planning document. On May 16, the Commission held a public hearing. The Greene County Board of Supervisors held their public hearing on June 12.

Summary of Recommendations
Based on public outreach and the overall planning process, the TJPDC and Advisory Panel assembled 26 recommendations. Refer to Chapter 4 for more detail on these items.

EXISTING CONDITIONS

2
INTRODUCTION ON EXISTING CONDITIONS

For a planning process to be successful, there must be a clear understanding of the unique conditions that exist in the study area. The Planning Team reviewed various sources of information to develop an existing conditions assessment. Sources included relevant planning documents, existing and forecasted demographic trends, transportation facilities and data, land use, zoning and environmental constraints, historic assets, and economic indicators. The Planning Team reviewed the 2016 Greene County Comprehensive Plan, the Water Supply Plan for the Rapidan Service Authority, the 2009 Greene County Multimodal Corridor Study, the 2035 Rural Long-Range Transportation Plan, and the 2008 Greene County Park Master Plan.

DEMOGRAPHICS

The TJPDC conducted a review of all available demographic data and trends available for the Ruckersville area. This included reviewing the latest demographic data from the U.S Census American Community Survey, the Bureau of Labor Statistics, Weldon Cooper Center for Public Service population projections, and other state and regional data sources. Results of the analyses helped shape the planning effort and recommendations included in Chapter 4.

Population and Age

The total population in Greene County has been steadily increasing since 2000. There has been a 19% increase in the decade between 2000 and 2010. Since 2009, the population is increasing on average by 1% each year. Population projections from the Weldon Cooper Center for Public Service show that by 2040, Greene County should expect a total population of 26,596, which is a 29% increase compared with the 2015 population estimate.

Two particular age groups, ‘Youth’ defined by a population age group of 20 to 35 years, and the ‘Elderly’, aged 65 years and over, had different patterns of change over the past few years. The youth population has not experienced major changes until 2014,
with a 6.5% increase from 2013. The elderly population, instead has been increasing steadily by an average of 6% each year.

The Ruckersville area, defined by three block groups, accounts for nearly 40% of Greene County’s population. In recent years, the total population in the Ruckersville area increased at a faster pace compared with the county, marking a 4.3% and 7.1% increase in 2014 and 2015 than in previous years.

**Zoning Audit**

The TJPDC conducted a code audit, to provide an overview of Greene County’s Zoning Code as it applies to the Ruckersville study area. This audit does not represent a thorough analysis of all code sections but identifies areas for further study. The code audit should serve as a resource for developing a scope of work for recommendation LU-1: Comprehensive Zoning Audit, which includes recommendations ED-4 and LU-3. The outcomes of those efforts will serve as a detailed plan for amending the code, as needed.

**Local Policies**

The Comprehensive Plan is a locality’s primary policy document, helping to guide decisions with land use laws, capital investments and other initiatives. The Greene County Comprehensive
Plan identified a series of growth areas around the Town of Stanardsville and the Communities of Ruckersville and Corner Store. Of the County’s growth areas, the Comprehensive Plan identifies these locations as focus areas for future growth, with mixed-use village centers surrounded by a mix of suburban residential, and industrial and mixed-use residential uses. The Ruckersville Plan supports these land use policies and provides guidance on how best to meet the community’s desires.

Utilities
Public utilities are key services provided by government and utility companies and made available to residents. The Ruckersville plan includes an analysis of public sewer and water service. TJPDC worked with the Rapidan Service authority to collect and update maps of the sewer and water service area in Ruckersville. Additional analyses included an assessment of broadband availability and cellular communication tower locations.

Transportation
With the assistance of VDOT, the TJPDC and County staff reviewed transportation conditions in the Ruckersville area. The condition analyses provided the foundation for the transportation related recommendations included in Chapter 4. Key transportation factors include congestion (measured using volume to capacity ratio), safety measured using crash data analyses, a sign inventory, and the percentage of heavy vehicles using the US 29 & 33 corridors (large trucks and busses).
Volume to Capacity Ratio

Volume to capacity ratio measures a roadway’s actual ability to accommodate traffic in relation to what the roadway was designed to handle. Dividing road segments’ volume by its capacity results in its V/C ratio. A V/C ratio greater than or equal to 1 represents a segment that is operating over its intended capacity, resulting in significant traffic delays. The map below shows 2014 V/C ratios, with portions of US 29 south of the 29 and 33 intersection at or near capacity. The projected V/C ratio map below uses model assumptions to predict future changes in V/C ratios based on population projections. The vast majority of road segments in the study area remain close to their 2014 values, however, one segment along Matthew Mill Road does show an increase.
Crash Hot Spots 2011-2017
The Virginia Department of Transportation (VDOT) collects and provides data regarding vehicle crash locations and severity. The crash hotspots map below was created using VDOT vehicle crash data from the years 2011-2017. Areas with a high frequency of crashes and high severity are identified by the red and orange colors on the heat map.

Environmental Resources
The TJPDC reviewed all available environmental data for the Ruckersville area. The review included mapping sensitive habitat areas, steep slopes (slopes over 25% grade), wetlands, floodplains, and natural land cover. Staff also reviewed cultural and historic resource data provided by the Virginia Department of Historic Resources.
VISIONING 3
Plan Vision Statement
The mission for Greene County and the Ruckersville Advisory Group is to foster a Ruckersville that will:

“Support diverse employment and housing opportunities, so that residents can live, work and shop in Ruckersville; and, attract visitors and new investment in the local economy.”

This mission will be accomplished with a vision, to:

“Create a sense of place through continued citizen-driven processes that aim to bring a holistic approach to improving, shaping and investing in a better Ruckersville.”

GOALS, OBJECTIVES, AND RECOMMENDATIONS
The goals and objectives fall under the mission and vision statements, as ways to bring additional detail on how to shape Ruckersville’s future. As a SMART document, all goals and recommendations must be tied to a recommendation or action item. Those recommendations have subsequent sub-tasks, as laid out in Chapter 4.

Transportation
Goal A: Enhance efficiency of the existing transportation network.

Objective A-1: Facilitate improvements for internal circulation and movement through the US-29 and US-33 corridors

Recommendation T-2: Operational Improvements
Recommendation T-4: Road Network

Objective A-2: Improve access.

Recommendation T-5: Access Management

Goal B: Improve safety of the transportation network for all users.

Objective B-1: Bike and Pedestrian

Recommendation T-3: Develop Bike and Pedestrian Recommendations
Recommendation T-5: Access Management

Infrastructure
Goal C: Improve fast and reliable internet service throughout the Ruckersville Area

Objective C-1: Improve access to reliable and affordable broadband services

Recommendation I-1: Continue Greene County Broadband Initiative
Recommendation I-3: Develop a Common Vision with Utility Providers

Objective C-2: Improve wireless coverage and network capacity

Recommendation I-1: Continue Greene County Broadband Initiative

Goal D: Foster safe and reliable utility services, based on community needs and demand.

Objective D-1: Support expansion and increased reliability of the drinking and wastewater system

Recommendation I-2: Continue Water and Sewer Audit
Objective D-2: Enhance communication among utility service providers and the locality.

Recommendation I-3: Develop a Common Vision with Utility Providers

Land Use

Goal E: Make necessary recommendations to achieve the plan vision.

Objective E-1: Further understand current and future land use patterns, to guide decisions

Recommendation LU-1: Comprehensive Zoning Audit (zoning text amendments)
Recommendation LU-3: Open Space Requirements
Recommendation ED-4: Audit of Commercial and Industrial Zoning Districts

Goal F: Accommodate appropriate and strategic residential and economic growth.

Objective F-1: Make recommendations through code reviews and audit.

Recommendation LU-1: Comprehensive Zoning Audit (zoning text amendments)
Recommendation LU-2: Targeted Zoning Map Amendments
Recommendation ED-4: Audit of Commercial and Industrial Zoning Districts

Economic Development

Goal G: Increase Ruckersville’s unique sense of place.

Objective G-1: Take actions to enhance Ruckersville as a destination for residents and visitors alike.

Recommendation C-1: Disrepair Remediation
Recommendation C-2: Marketing and Branding for Recreation Opportunities Recommendation C-3: Community Center
Recommendation C-4: Streetscape and Beautification Plan
Recommendation C-5: Community Events
Recommendation C-7: Medical Services
Recommendation C-8: Additional Parkland
Recommendation T-1: Route 29 Median

Goal H: Grow the local economy by attracting new and expanding existing business opportunities.

Objective H-1: Support existing businesses

Recommendation ED-4: Audit of Commercial and Industrial Zoning Districts
Recommendation ED-5: Tourism and Visitation

Objective H-1: Attract new business opportunities

Recommendation ED-1: Business-Ready Sites
Recommendation ED-2: Regional CEDS Plan

SWOT Analysis

A SWOT analysis is a frequently used planning tool to assess a community’s major strengths, weaknesses, opportunities, and threats. This analysis was used to help identify and build a list of local action items and priorities, to create and inform the plan’s recommendations, refer to Chapter 4. This section helps to identify ways to build on strengths, overcome weaknesses, take advantage of opportunities, and, avoid potential threats.
Strengths
Strengths are existing features, amenities, and characteristics that lead to a community’s success. These include intangible attributes as well as physical assets. Successful communities reinforce, protect, and build on their strengths. Through the community survey and the three public open houses, many residents expressed that one of Ruckersville’s major strengths was its location at an important crossroads. U.S. 29 averages 31,000 trips per day, whereas U.S. 33 averages 20,000 trips per day (VDOT 2017). Additional strengths included:

- Proximity to Charlottesville
- Relative affordable cost of living
- Quality of schools
- Available vacant land for development
- Visibility

Weaknesses
Weaknesses are existing features, conditions or problems that hinder a community from realizing its goals. A community should consider ways to address or overcome these obstacles. Through the community survey and the public open house, many residents expressed that Ruckersville’s weaknesses include:

- Existing visual clutter
- Blight
- Traffic congestion
- Crossovers on U.S. 29
- Lack of diverse shopping, dining, and entertainment destinations
- Lack of a sense of place or central place to gather

Opportunities
Opportunities, unlike strengths and weaknesses, are more forward-looking and deal with larger forces. These are future prospects that could help a community realize its goals. A community should consider ways to strategically take advantage of these opportunities. Many of the public comments received expressed optimism and highlighted opportunities for what the Ruckersville Area could build on or become in the future. Opportunities included:

- Location and proximity to Shenandoah National Park
- Available undeveloped properties
- Room to grow
- Affordability of property
- Volume of traffic passing through the corridor

Threats
Threats, like opportunities, are more forward-looking than strengths and weaknesses. These future challenges could hinder the community from realizing its goals. A community should consider ways to avoid or mitigate threats. Threats include:

- Increased traffic
- Disrepair and blight
- Greater development pressure
- Too much growth too quickly

Scenario Planning
The Planning Team used a scenario planning approach to bring all public engagement and recommendations together, through several maps. Scenario planning involved consideration of existing conditions, community input, and survey results to develop a future vision for the Ruckersville area. The Advisory Panel conducted the exercise, as the public vetted the final maps at the second public open house.

NOTE: The scenario plans do not function as land use laws. These maps are intended to provide detail to the Comprehensive Plan’s growth area designation for the Ruckersville Study area. The scenarios serve as a general concept that is not parcel specific.
### Introduction to Recommendations

This section details the recommendations from the Ruckersville Area Planning effort, which spans a ten-year period. The planning effort is just the beginning to creating the community that Ruckersville residents and businesses want to create.

### Purpose

The purpose of this section is to provide a SMART approach to the Ruckersville Area, with recommendations that are:

- Specific
- Measurable
- Achievable
- Realistic
- Timely

There should be at least one annual meeting between County staff, local businesses and Ruckersville residents, in order to measure progress on the following actions. Progress will only be possible with enforcement and commitment from all parties.

### Overview

There are 24 recommendations as part of the Ruckersville Area Planning Effort. Each recommendation is detailed in an info-box. This allows the reader to view all relevant information in an easily referenced table. Each info-box has 14 boxes of information.

### Recommendation

A short and concise project title helps to identify the recommendation.

### ID

The project ID is an easily referenced code for meetings and discussions. This allows County staff, local officials, business owners and Ruckersville residents to quickly identify project recommendations. The recommendation ID does not imply priorities.

### Category

Recommendations are assigned to one of the following categories, even though some recommendations could serve multiple categories. In this document, recommendations are ordered by these groups:

1. Community
2. Economic Development
3. Infrastructure
4. Land Use
5. Transportation

### Type

There are five types of recommendations:

- **Initiatives**: A one-time effort, receiving funding and other resources
- **Programs**: A recurring effort, receiving annual funding and resources
- **Capital Improvements**: A physical improvement, funding by either local or state funding
- **Codes and Ordinances**: Legal changes to the County Code
- **Policy**: Changes in local policies, through official action

### Description

This box includes a brief description of the recommendation, providing a general overview of important points.

### Outcomes

Outcomes are the end deliverables or intended final result of a recommendation.

### Point of Contact

This is the one point of contact for the identified recommendation. While many departments, groups or individuals may be involved in a recommendation,
there is one point of contact. The point of contact is accountable for following up on deliverables and ensuring that the recommendation is moving forward on schedule.

**Partner**
Partners are contributors to delivering a recommendation. These individuals or groups take direction from the point of contact.

**Priority/Timeline**
This item identifies the general priority of the recommendation: Immediate (years 2018 – 2020), Short-Term (years 2021 – 2024), and Long-Range (years 2025 – 2028). It also includes a more specific timeline for delivery, identifying the year of completing the recommendation. As this planning effort has a ten-year planning horizon, years include 2018 through 2028.

**Justification**
This item provides justification or reasoning for the priority/timeline. Justifications include:

- **Build Momentum** – for projects that are relatively easy to implement and would help build momentum for the overall effort
- **Immediate Need** – for recommendations that must meet a high priority need of the community.
- **Logistical Barriers** – for high priority projects that cannot be quickly implemented because of some logistical challenge
- **Lower Priority** – for recommendations that are important to the community but a lower overall priority

**Steps**
Any recommendation includes a series of specific steps. This box includes a more detailed outline of how a recommendation will be implemented. Steps may include a more detailed break-down of the timeline, listing specific dates for completing sub-tasks.

**Sources**
Each recommendation arose from one or multiple sources, including:

1. Survey responses
2. Open House comments
3. Goals
4. Greene County’s Comprehensive Plan
5. Other adopted plans
6. Staff assessments
7. The Ruckersville Advisory Panel

**Budget**
The budget section provides preliminary estimates for implementing recommendations. Estimates are based on general assumptions, as opposed to detailed project scopes, and are not to be referenced as final project costs. Estimates do not include hourly costs for County staff or volunteer time. Most recommendations have a budget of TBD.

**Notes**
The Notes box includes other general comments and information, as needed. Items listed with an * are further detailed in the Notes section.

**Overview of Recommendations**
An overview of recommendations for the five categories can be found on the following page.
Community Recommendations
The Community category includes recommendations that address general community needs. While some info-boxes could be included in other categories, such as Land Use, these recommendations primarily address needs for beautification, community events, parks or other community development functions. Several recommendations require creation of new groups and committees. Getting interest and sustaining this community involvement for ten years will be a great challenge. This will require significant effort from the Ruckersville Advisory Group (C-9), a key component to implementing these recommendations.

Economic Development Recommendations
Throughout the planning processes, public comments related to economic development were prominent in survey responses and open house events. These comments consisted of desires for job creation, along with new dining and shopping options. There are five recommendations related to economic development, mostly with immediate timelines.

Infrastructure Recommendations
There are two recommendations related to infrastructure. Both involve existing efforts that are already underway but would influence the Ruckersville project area.

Land Use Recommendations
The Land Use section involves local zoning and subdivision ordinances.

Transportation Recommendations
Transportation is inherently a long-range field. Considerable time is needed to evaluate transportation needs, secure funding, and continue through the construction process. Consequently, this category has more short-term and long-range timelines. These recommendations will supply guidance to Smart Scale applications, on a biennial basis.

**Recommendation:** Disrepair Remediation  
**ID:** C-1

**Category:** Community  
**Type:** Initiative | Capital Improvements | Program

**Description:** Work with businesses and property owners to identify and remediate properties in disrepair. This includes development of strategies for removing or renovating blighted structures.

**Outcomes:** Safety | Economic Development

**Point of Contact:** Planning Department  
**Partners:** Economic Development & Tourism | Property Owners

**Priority/Timeline:** Short-Term (2024)*

**Steps:**
1. Identify properties in disrepair (2018)
2. Research state programs that help assist property and business owners with property maintenance (2018)
3. Develop a document that outlines strategies for remediating disrepair (2019)
4. As needed, identify funds for remediation of properties in disrepair (2020 through 2024)

**Sources:** Survey | Open House  
**Budget:** TBD

**Notes***: Delivery is short-term, but there are more immediate steps to begin this process. A realistic expectation is that not all properties in disrepair will be addressed. A measurable goal is to have at least 50% of identified properties remediated by 2024. The intersection project at US 29 and 33 will already address several properties in disrepair, with removal of structures.

</table>
| **Steps:**          | 1. Identify existing medical needs in Greene County  
                       2. Present the medical Needs Assessment to healthcare providers for consideration |
| **Sources:**        | Comprehensive Plan | **Budget:** | TBD |
| **Notes**:          | There is already a satellite office in the Hollymeade area of Albemarle County. The need for additional medical services in Greene County may be a need, but an additional office in this area may not make financial sense to healthcare providers at this time. |
Recommendation: Additional Parkland

ID: C-8

Category: Community  Type: Initiative

Description: Conduct an inventory of properties within and around the study area that may be appropriate for new parkland and public space.

Outcomes: Property Inventory

Point of Contact: Parks & Recreation Department  Partners: Planning Department

Priority/Timeline: Short-Term (2023)  Justification: Lower Priority

Steps:
1. Conduct a search of property records, overlaid with potential natural amenities that would be ideal for a park
2. Work with private property owners to narrow the list of potential sites
3. Present recommendations to the Board of Supervisors

Sources: Ruckersville Advisory Panel  Budget: Staff Time

Notes*: With an existing park in the corridor, priority goes to implementation of the 2008 Park Master Plan. In annual reviews of these recommendations, consider evaluating the timeline once more immediate efforts are completed.

**Steps:**
1. Meet with representatives from VDOT to detail process  
2. Prepare the formal VDOT agreement for submission  
3. Board of Supervisors to review and approve the agreement

**Sources:** Survey  
**Budget:** Staff Time

Appendix 1: Project Contract

CONTRACT FOR THE RUCKERSVILLE AREA PLANNING PROJECT:
GREENE COUNTY & THE THOMAS JEFFERSON PLANNING DISTRICT COMMISSION

PURPOSE OF AGREEMENT:
This is provided to Greene County (hereinafter referred to as the “County”) by the Thomas Jefferson Planning District Commission (hereinafter referred to as the “TJPDC”), to identify the responsibilities, scope of work and cost of the Ruckersville Area Planning Project (“the Plan”).

PARTIES TO AGREEMENT:
Greene County
John Barkley, County Administrator
40 Celt Road
Stanardsville, VA 22973
Telephone: 434-985-3705

Thomas Jefferson Planning District Commission (TJPDC)
Chip Boyles, Executive Director
401 E. Water Street, P.O. Box 1505
Charlottesville, VA 22902-1505
Phone: 434-979-7310 ext. 110
E-mail: cboyles@tjpdc.org

PRINCIPAL CONTACTS
Stephanie Golon, County Planner
P.O. Box 358
40 Celt Road
Stanardsville, VA 22973
E-Mail: sgolon@gcva.us

PDC CONTACT
Wood Hudson, Planning Manager
401 E. Water Street, P.O. Box 1505
Charlottesville, VA 22902-1505
Phone: 434-422-4825
E-mail: whudson@tjpdc.org

PERIOD OF AGREEMENT:
The term of this agreement is proposed to be effective beginning August 1, 2017 and ending March 31, 2018. The end date may be extended if agreed to in writing by both parties.

COMPENSATION:
The TJPDC shall be compensated by the County for the costs of services associated with the Ruckersville area Planning Project, as outlined in Appendix A. The TJPDC shall complete the scope of services as defined in Appendix A for an amount not to exceed $21,390. The total budgeted amount for the project is $28,000.00 which includes a $6,610.00 match that is provided by the TJPDC.

The total fee includes labor, benefits, indirect costs, travel, mileage and in-house printing and copying expended by the TJPDC. Any printing or copying requiring external sources will be provided by the County.

PROJECT DESCRIPTION:
The Thomas Jefferson Planning District Commission will provide assistance to Greene County, in regard to the Ruckersville area Planning Project, as outlined in Appendix A.
OWNERSHIP OF MATERIALS:
All materials, maps, reports, documents, and other work products prepared under a proposed Agreement shall be owned by the County, provided, however, that the TJPDC may retain file copies of any or all of these materials for its own use in future, reports, publications and marketing materials.

TERMINATIONS:
This Agreement may be terminated for cause or for mutual convenience if the parties so agree. Such termination shall take place thirty (30) days after written notice of the termination agreement. In the event of termination, the TJPDC shall assemble all information prepared under this Agreement to date and shall forward it to the County. The TJPDC shall be entitled to recover its costs for all work completed.

AMENDMENTS:
The proposed Agreement, including the scope of work, may be amended or modified by a written amendment signed by the County and the TJPDC.

SCOPE OF WORK:
The TJPDC will perform planning services for the County in accordance with the proposed scope of work, attached as Appendix A.

PAYMENT:
The TJPDC would send monthly invoices to the Greene County Planning Department. The invoices will include a status report with a list of services and tasks provided to the County, along with a breakdown of costs and the number of hours spent on each task. The County agrees to make payment on these costs within thirty days of receiving each individual invoice.

Accepted by:
Thomas Jefferson Planning District Commission (TJPDC)

By: Charles P. Boyles, II/Executive Director

Date: June 26, 2017

Nelson County

By: John Barkley, County Administrator

Ruckersville Area Plan Public Meeting Notes

Existing Conditions

- How the public comments will be collected and made visible online? (format, method)
- Employment data of areas beyond the area boundaries should also be included.
- Projections, trends should be provided in addition to snapshots in terms of data analysis
- Population change in specific age groups such as Millennials and Babyboomers should be analyzed.
- Projections for population as well as commercial growth should be included to better predict future demand for utilities such as water and electricity.
- Historic land use data should be analyzed to demonstrate changes already took place.

Vision

- The vision should be published and made available for citizens to review.
- The achievable framework’s timeline may not necessarily be limited to 10 years. It depends on the nature and scale of a project.
- Visual representation of potential implications is needed (e.g. what might happen if the intersection safety is improved).
- “Capturing potential residential development of Greene County in Designated Growth Areas” clarifies the vision better.

Goals

- Electricity should be part of the “utilities” goal.
- We should use “by-end commitment among utility service providers and the locality” in addition to “enhance communications” under “infrastructure” goal.
- Ruckersville currently lacks a sense of place. Promoting economic growth is necessary, but having a sense of place is also important. Creation of a walkable “town center” where people will stop by and enjoy various activities should be part of the plan.
- The importance of focusing growth on Designated Growth Areas to save utility deployment/installation costs should be mentioned in “land use” goal.
DRAFT Vision: October 13th Working Group

Ruckersville will have a sense of place through citizen-driven community planning that includes improvement of transportation, utility, and land use tools. Ruckersville will support diverse employment and housing opportunities that allow people to live, work and shop in Ruckersville while attracting others’ participation in the local economy.

DRAFT Goals:

TRANSPORTATION
- Enhance the existing transportation network by facilitating the improved efficiency and circulation around the US-29 and US-33 area;
- Improve the safety of the transportation network for all users; and,
- Improve access.

ECONOMIC DEVELOPMENT
- Work to increase Ruckersville’s unique sense of place and provide the foundation for enhancement of the area as a destination for residents and visitors alike;
- Support existing businesses; and,
- Grow local economy by attracting diverse business and employment opportunities that include service, retail, and light industry.

INFRASTRUCTURE
- Continue to encourage the increase of coverage and speed of broadband and telecommunication service;
- Support strategic expansion and increased reliability of the water, wastewater, and electric system; and,
- Enhance communication and promote strategic planning among utility service providers and the locality that support the community’s sense of place.

LAND USE
- Further understand current and future land use and transportation patterns to make necessary recommendations to achieve the vision;
- Provide recommendations that accommodate appropriate and strategic residential and economic growth; and,
- Provide diverse recreation opportunities and promote conservation of open space and sensitive habitats.
FRAMEWORK

DIAGRAM EXERCISE

This is an exercise in free-flowing creativity. Where there are no right or wrong decisions. This does not require deep and critical thought. The intent of this exercise is to be creative and to recognize potential development throughout the study area that seems logical. Logical does not mean that the current use is the right use and it should remain that way, logical may actually be a completely different use. There are no bounds, meaning do not be afraid to create something out of the box. BE BOLD, BE CREATIVE, THINK LOGICALLY.

RULES:

- 20 minutes per 1 mile radius
- Let all voices within the group be heard (do your best to come to a consensus)
- Overlapping of uses is fine and even encouraged

GUIDELINES:

- Try not to get caught up in the details
- Think broad strokes
- Do not think on a parcel by parcel basis
- Do not dwell on the existing structures or uses
- Just because you suggest a use that differs from what is currently there does not always mean you are changing the physical footprint of what is currently there
  - EXAMPLE: You draw a park polygon over a section of a residential neighborhood.
    - This means that the neighborhood should incorporate more parks / open space, you are not getting rid of any of the existing structures

*REMEMBER, YOUR GROUP ONLY HAS 20 MINUTES FOR EACH 1 MILE RADIUS*

TIP: If you are struggling with a particular area, try and determine the uses of an area adjacent. This will help because typically uses should face one another.

IF YOU HAVE QUESTIONS OR NEED GUIDANCE, JUST ASK WOOD, NICK, OR KRISTIAN

Memorandum

To: Advisory Panel, Ruckersville Area Plan
From: Will Cockrell, Director of Planning
Date: March 9, 2018
Reference: Recommendations and Zoning Audit

Purpose: The Advisory Panel for the Ruckersville Area Plan will meet on March 16th, to review project deliverables, specifically the latest recommendations document and zoning audit, and to discuss next steps.

Background: March 16th will be the sixth and final scheduled meeting of the Advisory Panel. TJPDC staff focused on two items since the February 16th meeting. First, staff recorded the Panel’s comments on the recommendations and created a 21-page document that will serve as the implementation section of the final plan. Second, staff formatted the zoning audit for the Panel’s review.

Summary: The Panel will review these two documents and help to create the final versions, which will be components of the Ruckersville Area Plan. The attached documents are designed to meet the Panel’s request, to create a document that will lead to results and positive change in the study area. The recommendations are intended to be SMART (Specific, Measurable, Achievable, Realistic, Timely) and serve as a to-do list for Greene County officials and the Ruckersville community, including residents and businesses. Since the previous draft, staff:

- Reworked the Blight Remediation recommendation, to be more of a collaborative effort with property owners (C-1);
- Reworked the recreational opportunities and community events recommendation (C-2 and C-5) to be oriented more towards marketing and branding existing events;
- Added a recommendation to create a Ruckersville Advisory Group (C-9), as recommended by the Advisory Panel;
- Reworked the business-ready sites recommendation (ED-1) to be focused on identifying those sites;
- Added a recommendation to explore ways that the zoning ordinance can enhance economic development opportunities (ED-4), per the Panel’s recommendation;
- Added a tourism and visitation recommendation (ED-5), per the Panel’s suggestion.

Staff also added pages of additional detail on each recommendation, including timelines, points of contact, steps, budgets (if available) and additional notes. The zoning audit will be new to the Panel and is attached in this packet.

Action Items: Staff asks that the Advisory Panel provide additional feedback on these two documents, at or before the March 16th meeting. Please contact Nick Morrison nmorrison@tjpdc.org or Will Cockrell wcockrell@tjpdc.org for more information or questions.

Ruckersville needs a change of identity, similar to what the Short Pump area west of Richmond has done—make the image and develop the area to improve this image. This will help the Ruckersville corridor appeal to travelers and those living in surrounding communities.

There is no “town” to Ruckersville, it is just a stop light on Route 29. I have a Stanardsville delivery address but Ruckersville is closer for shopping, etc. but there are no activities that would attract me to Ruckersville. I go to Charlottesville for dining, movies, events, etc.

It’s lacking the feel of a real town since it doesn’t have a main street and/or city center. It badly needs beautification and walking trails/parks.

Lived here for over 5 years and still can’t understand exactly where the town is. I see a couple of lights and off road businesses but not a town per se. It is a place to drive through.

Small town feel with local businesses, not chains!

By increasing communication from our schools is a number one priority. More activities from parks and rec the creation of a community center for people to enjoy such as swimming etc... We need to pick a real theme in Greene county. We need to be open to some changes while keeping the History that is already here. We have the Big Red Building on 33 which was once a trading store where people used to stop going over the Mountain, we have the very first post office in Ruckersville which is not recognized as being this with a plaque. There is a house in front of Walmart that is going to be torn down because Burger King is going to build there. These are places that once they gone Ruckersville is going to be just Charlottesville we need embrace our history before it is gone.

The town needs to be improved visually to add character other than rustic. Eastlake community in Southern California is a good example of a well developed area.

Ruckersville lacks any feeling of being a “town”, both in identity and in layout. The former could be addressed by marketing Ruckersville as “Antiqueville”, and bringing in retail tourism. The latter could be addressed by creating Green Space, public parking, public transportation stops (especially to Charlottesville), and pedestrian access in the 33/29 area. You need to invite visitors to park their cars and visit more than one local business. Other ideas: bike path to the National Park - Green Space and parking opposite Gateway Shipping Center (south of 33) - connecting roads around the intersection to alleviate congestion and increase access.

A town center would be wonderful. Post office, pocket park, restaurants, trees. A place to call “Our Ruckersville.” It’s missing.

Improve on what’s here. Don’t try to turn ruckersville into a new hollymead.

Consider more than just what other local counties do. Greene is a great place, capitalize on its greatness with new, fresh, innovative ideas. The community will thank you for it.

Connect it to the area. It is a place to drive through right now plus a Walmart. It adds no value to the community at large.

Create an actual town center not on Rt 29. A multi generational recreation center would be nice, too.

I am very pleased to finally see Greene’s attention focus on our economic engine: Ruckersville. It is time to create the green spaces, parking, pedestrian access, public transportation options to turn Ruckersville from a intersection surrounded by strip malls, into an inviting town.

I would hope the plan will incorporate attractiveness (i.e., underground powerlines) such as landscape, clean open space to allow possibly a small park/ playground for picnicking, etc. as tourists. No large billboards, please.

Develop a wide range of businesses, not just national chains. Consider a change of identity that highlights the Ruckersville area’s and Greene County’s central location, convenient to many attraction and tourist draws. Create a name to reflect this (i.e., Midway on Crossroad) Let Ruckersville remain the PO address, but use the new identity to promote the area, such as what was done with Short Pump.

The first impression of Ruckersville is the 29-33 intersection which is horrible and depressing. The first order of business should be to improve & give class to the area. Look at Gordonsville and note the differences in appearance. First impressions are everything.

Talk to property owners along 29. Not the realtors. This appears to be an exercise to justify low income housing. Been there done that didn’t work.

Clean up and modernize the intersection of 29 and 33. the businesses in that area are all eyesores. There’s no cohesive plan and the buildings are a mix of low quality structures.

Zoning ordinances requiring a more cohesive look to businesses along Rt 29.

Better structure for future development to change ruckersville from a drive thru town to a place where people come to stay and spend money.

Ruckersville is basically one big intersection. If a new pedestrian friendly “downtown” area was created, Ruckersville would feel more like a community rather than just a big intersection filled with chain retail stores.

Do something about the eyesore on the northeast corner of the intersection of 29 and 33. Consider consolidation of Ruckersville. It’s difficult to improve or organize a “location” that is little more than a zipcode.

We need charm and aesthetics. Greene needs to be green. Commercial needs to have apartments above it and around it.

there is no central area

The corner of Rt. 29 and Rt. 33 is in need of much improvement. I was told 8 years ago when I moved here that the area was going to be cleaned up and run down buildings were going to be removed. however, during those eight years nothing has been done to improve the area. It looks like a slum area, and says loud and clear that the county appears not to be concerned about the appearance of that entire area. Would also like to see a good restaurant come to our area, no more hamburger, pizza, or Mexican restaurants, quality restaurants.

Spruce up the intersection at 29 & 33. It’s an eyesore, especially the east side. Additional roadway lighting would be beneficial. Left turn at night is hazardous come to think of it the whole circle is an eyesore. More mowing in summer along roadway. High grass presents blind spots.

Add assisted living housing

Deal with the Stone quarry; shut it down

Ruckersville is a mess of hodgepodge of disjointed nothingness. There needs to be a cohesive vision for creating an attractive center where people are drawn to work, shop and play.

55 and older communities

Transform Ruckersville into a more attractive small town that looks like it has a plan instead of the current hodge-podge of legacy car lots, sad old motels, and mis-matched strip malls. Good zoning with consistent architectural standards are a must. Think: More Jack’s Shop, less Trail Motel.

I would like the intersection of 29/33 to look nicer… some of the buildings are terrible 😞. It would be so nice if we had a nice “center” to Ruckersville . Bike trails at a park would be awesome as well. A recreation center for activities, tennis, pool, and after school activities would be good. PLEASE put money back into the schools.
9/13/2017

Too many “antique shops” make the town look cheesy. Greene County is beautiful and Ruckersville is the first impression of the Gateway to the Blue Ridge Mountains. We need to get rid of the cheap looking antique shops and build a better intersection at 29 & 33. Ruckersville is also the first impression many tourists get when approaching Charlottesville, and right now, it’s not very enticing. I’ve grown to love the local restaurants, but first impressions are lasting. Right now, the first impression is strip mall town.

9/13/2017

Creating a better walking community for businesses and potential apartments. Reclass Ruckersville as hubzone to attract additional small/medium businesses. Ultimately, get rid of older buildings and replace them with new ones.

9/13/2017

Ruckersville is a dump heap pretending to be a ghost town. Business owners/property owners need to take some pride and clean up the properties. The former Mr. B’s needs to be removed as a eyesore. Buildings need to be spruced up and attention needs to be paid to landscaping. A mandatory mowing requirement would go a long way as would seeding the DMV center with wild flowers. Property is over-priced for what it is. Too many used car lots and those not well attended. Ruckersville needs a spring cleaning for all of the junk, the unused/skeletonized signs/billboard, excess signage, etc. The motel in the center of town limps and is in poor condition. If we expect anything to change, the first thing is to get rid of Mr. B’s. I hate the thought of eminent domain, but there is a tree growing up through the building for heaven’s sake, it is never mowed, the windows are broken out of it and the lot size is too small for any business to go into that location. Cleaning up that corner would go a long way to making the whole of Ruckersville look good.

9/13/2017

Make it a village in a rural setting. Do NOT bring in housing and shopping centers. I keep moving and sprawl keeps following! Very few people who live here want development of the kind seen in suburbs around VA.

9/13/2017

I would hope quality of life would be more important than building more houses, apartments and shopping centers. When I moved here there were farms with cows and goats. Now I’m surrounded by houses. I’ve lived in areas where developers just wanted to build more and more and now those areas are crowded, congested and the quality of life is awful.

9/13/2017

Do more for the seniors, better housing, roads, shops and helping everyone in this town.

9/12/2017

High end strip mall standards to make them more like community gathering spots. Offer incentives for businesses to construct and utilize facilities. Embrace technology, make internet services a local utility so that remote technology jobs are more possible. Remove the median strip and make access lanes on the 29 corridor. Build/attact a venue.

9/12/2017

Special use permits should not be granted if the proposed business will have a negative impact on residents and residential property values.

9/12/2017

We need more lower cost housing! People of modest income must have a place to live, and higher income people shouldn’t stand in the way.

9/12/2017

Tear down the hideous abandoned gas station at 29/33! Make our town more pedestrian friendly. Spruce up existing infrastructure.

9/12/2017

The intersection of 29 and 33 is gross. Major overhaul is needed. Traffic is also bad at this intersection. Old buildings need to be cleaned. Separately, a Home Depot and higher class grocery store ( Wegmans, Harris teeter, etc) would be great for the growing middle class that commutes into cville. A public county-run outdoor gun range, dedicated farmers market area, and a dog park would be nice amenities.

9/12/2017

There needs to be a concerted effort to consider the appeal and “look” of Ruckersville as stores are built or established. Right now it is a mish-mash of random, lower end establishments and a glorified intersection. For instance, a brand new, stand-alone Family Dollar is NOT what the face of Ruckersville should be. Consider what we want Ruckersville to be and develop it to meet that.

9/12/2017

Lots of people are looking for quality affordable aps and townhomes. Terrence Greene tried to fill that void but their prices for the size and quality are terrible. They don’t offer any discounts to public safety like some places do, to attract those people. There are lots of people in cville who would like to be out of the city but they want to be anchored here in a purchased home. We need quality apt living. We need more places to eat that are good and not nasty like Rileys and Lazy Day. We need better places to walk to places.

9/12/2017

It would be nice to feel that the planning/zoning board and other county officials support local business. It appears that only those larger “box” stores and businesses get priority or preferential treatment. Focus the efforts on helping the locally owned small businesses succeed and not hold them back because someone doesn’t like the type of business.

9/12/2017

Tear down the eyesore of flea markets @ 338/29. Get a clean or clean ordinance in place for the county then go after property owners who do not abide. demise of gas station at 2933 comes to mind, which has sat empty for 20 years. No more car parts stores enough already. Go after businesses that actually contributes to county. A comprehensive architectural review so Rville is not this rag tag, hodgepodge looking intersection. No more flea markets! Lastly, understand the role of Rville. It will never be a destination but a “place on the way to” and that is not a bad thing. Play to that. Get quality not quantity low point businesses. Stop with this notion of it is going to attract some factory which is going to provide local jobs. Think outside the box, work with the local tech school to provide welding, refrigeration/air conditioner repair, plumbing. Jobs that this community actually needs, uses. Strike to be different and embrace that difference instead of trying to make Rville fit into a ready made, worn out improvement model that is not successful and in fact is setup to fail when criteria & expectations can not be met. Lastly, get fresh, creative thinkers into the room, not the tried(tired) and usual cast of local characters. Look at what realistically can be done, now, 1 month, 6 months, 1 yr, 5yr.

9/12/2017

I’m okay with growth, but don’t forget our roots. I know the antique buildings at 29/33 intersection are probably a problem for making the intersection bigger and better, but I don’t want to ever see those buildings moved or tore down. Those buildings are Ruckersville.

9/11/2017

I would LOVE to see the 4 corners of RT 33 & 29 “cleaned” up with legit, reputable looking businesses and ESPECIALLY want to see that abandoned eye sore of an old gas station developed. Why is that allowed to stay that way? Would also love to see all 4 corners of that intersection have legit, established businesses to give the impression that we are not some antiquated town totally dependent on selling antiques. we have so much more to offer!

9/9/2017

Byight businesses which use equipment, trailers and trucks need to be located in the designated business areas not in subdivisions. New housing developments provide high enough proffers to pay for infrastructure, schools, roads and not damage creeks, streams and the environment that is why people live here. Controlled and sensible growth.

9/7/2017

Replace all run down, empty buildings and lots lining route 29 and 33 (especially the old gas station at the intersection of 29 and 33) with usable businesses, green spaces and residential projects. Make a welcoming town center accessible to pedestrians with sidewalks and green spaces like a park with a walking trail/blur. Add restaurants please please please! Also replace the slop pit (next to it) is not a pretty site when someone first enters our county. That is not the image we should portray as “gateway to the blue ridge”. The antique stores are a draw for people traveling from other areas of the state and out of the state. They could be spuced up yet keep their character. Jacks Shop Kitchen is a wonderful addition... more like that. We should accentuate our nearness to the mountains and encourage outdoor activities. Hiking, biking etc and bring to life shops and businesses that with places to sit and walking paths. We have a great location and we should utilize it. Thank you for all your hard work and vision for our future. We can make Greene County a place we will enjoy for years to come.

9/7/2017

Please leave the antique stores at the intersection of 29 and 33 alone! They are a draw for people traveling through the area to stop and spend time and $$$. Maybe just spruce the appearance of the intersection.
1. Concerned about the dense buildings at Rt. 33 & 29. Public transportation in county and to Charlottesville a concern.

We would like to see current retail space occupied before new spaces are built, and have community input on workforce investment in infrastructure would be a great start. We’ll struggle with sustainable growth until we have things like public restaurants, movie theater, community recreation areas. We are much more than just parceled out farm land anymore.

Internet access for houses off the main roads. Especially the eastern side of Rte 29. Even with the tower, internet is spotty.

We have too many lots on 29 where businesses have closed and they are left to be eyesores. They need to be cleaned up. Solar farm to help with the cost of water. Need affordable housing. Another motel.

Internet access for homes off the main roads. Especially the eastern side of Rte 29. Even with the tower, internet is spotty.

High speed internet access should be available throughout Ruckersville. It would allow for more business opportunity and residential availability would make homes more valuable.

We need a big lake/reservoir for future water needs we should invest in a solar farm and truly make Greene green.

We need to attract sit down restaurants (and not another fast food or Mexican) so we don’t have to drive to other counties more business. All kinds of business.

We need better restaurants—not more Mexican restaurants, and businesses that are not auto or antique related! Better quality privately owned businesses more upscale restaurants.

I don’t want to see Ruckersville become as big as Charlottesville. I would like to see growth in both housing and business but!

More shopping. Bring an Olive Garden to Greene County! Nice signature colonial theme weekend start annual Yacht/boating event here. We have amazing small businesses in town that are well worth patronizing. Two or three of my favorite restaurants are in town and I rarely venture outside the county for a meal.

Clean up corner of 29 & 33. Looks awful and doesn’t reflect much for Ruckersville. When will Mr. B’s be condemned? It’s been about 15 years. It is dangerous/hazardous. Of rusted abandoned trucks on Rt 33, and 3. Unkempt bushes/grass on “For Sale” properties.

We need to have a variety of foods to eat. Bring in additional higher end restaurants to the area so one does not have to travel into Cville for a nice dinner. We would absolutely spend our money here in town. We are NOT interested in major chain restaurants (Texas Roadhouse, Olive Garden, etc) but rather smaller, family owned businesses such as Jack’s Shop Kitchen. The antique shops are neat and who don’t have a place to go in the morning. It would be highly successful.

I feel like there is a growing younger crowd, like me and my husband. We are young professionals, and we would love to move to a variety of areas in the area overpriced for the area.

I would love to have a HOME DEPOT store anywhere in the county!! A stronger cell tower to reach Dyke road. More restaurants.

We need better restaurants—not more Mexican restaurants, and businesses that are not auto or antique related!

Horrible service & Customer service but no other choice. Bought a house 4 minutes down the road and had to go from Comcast to Century Link. Took two months for them to get it to work and works worse than just having dial up. Supposed to have 25mps and have barely 6mps on a good day.

We need more restaurants that aren’t Mexican! Attempt to recruit a Bob Evans. There are enough elderly folks in the area who don’t have a place to go in the morning. It would be highly successful.

More business. All kinds of business.

We need better restaurants—not more Mexican restaurants, and businesses that are not auto or antique related! Better quality privately owned businesses more upscale restaurants.
More restaurants. No more Mexican restaurants. More focus on DECENT retail shopping like Short Pump or even Fredericksburg has.

We'd love to see more small businesses. Create a small town atmosphere with landscaping, street lights, sidewalks. This would benefit so many families and bring so much more business and shopping to Ruckersville!

We need more restaurants that are not fast food. We need to have things for kids to do. More shopping other than antiques.

We'd love to see more small businesses. Create a small town atmosphere with landscaping, street lights, sidewalks. This would benefit so many families and bring so much more business and shopping to Ruckersville!

More restaurants. Also, need to do more recreational activities for youth. A YMCA or even a community center with pool tables that provide a safe drug free environment for youth.

We'd love to see more small businesses. Create a small town atmosphere with landscaping, street lights, sidewalks. This would benefit so many families and bring so much more business and shopping to Ruckersville!

We need more restaurants that are not fast food. We need to have things for kids to do. More shopping other than antiques.

<td>10/3/2017</td>
<td>Don't make Greene a Charlottesville or a Northern Va. Help support local small businesses and family businesses rather than making it difficult. Use the money for developing more community recreation and things for our youth rather than building more utilitity housing.</td>
</tr>
<tr>
<td>10/3/2017</td>
<td>Doing this “development” is making Ruckersville/Greene into a place it’s not. People born and raised here are proud of the small town atmosphere, where everyone knows everyone and we shouldn’t have to worry about making Ruckersville look like a strip mall or something to make the environment more “Charlottesville-esque.” Why not take all this money for “development” to turn the county into something it’s not and instead pay teachers more and make owning a small business easier - i.e. taking care of the residents who love Greene for what it is, not turning it into something it’s not.</td>

<td>9/14/2017</td>
<td>Would love to have more hiking trails</td>
</tr>
<tr>
<td>9/13/2017</td>
<td>Ruckersville seems more like a bedroom community right now. It needs more family stuff. We travel out of town to skate, swim and have fun. I love raising my kids in Ruckersville. I wish there were more kid friendly places to take our kids on the weekends without having to drive 30-40 mins into Charlottesville. Little Gym, splash park, centrally located park, play zone, etc. Better sit down, kid friendly eating options is a must. Chick-fil-a, CCIs, ice cream place, etc. I have been trying for 3 years to obtain a job in Ruckersville that pays at least $32,000 a year. More job opportunities to cut down on the 1 hour commute would be fantastic.</td>
</tr>
<tr>
<td>9/13/2017</td>
<td>A more of a community feeling. Acceptance of all people. Greene feels out of touch with the rest of the world. Due to transient nature of this area we either have low income or middle income people that live here and go elsewhere to work. I think our community could benefit from less old Greene leaders and new, younger leaders that want the area to grow, be more. We also need to focus on education for all, equally. Schools need to tighten up on discipline and making the environment less Good ole boy.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Better school system.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>I would love to see bike lanes, perhaps a YMCA or athletic complex. There isn’t licensed daycare for children under 16 months old in Greene county- would love to see that become a childcare option for those living in Ruckersville.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>We moved to Greene County because we could not afford Albemarle County. I think Greene County needs to keep this in mind as they look to grow and add services, that the reason their residents most likely live here is because it is the exact OPPOSITE of Charlottesville/Albemarle County. Greene County has beautiful landscapes and does not have the annoying congestion that Charlottesville is facing. I would like Greene County to continue value their land and local residents who live here now over trying to compete with Albemarle County’s growth.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Obviously, with expansion of business comes increased population and the need for new and improved school facilities to properly hold and educate our kids.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Free family friendly music events, with food trucks and beer/wine tasting and gun free zones (no guns or hate groups allowed)</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>It seems that all we do is drive to Charlottesville for events, music, shopping. When there are Greene County events, they are in Stanardsville. We don’t have a sense of community - is Ruckersville is an address but not a community.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>The recent Greene fireworks display was a great idea. More events to bring the community together and things for families to do together.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Less focus on big retail space. More focus on a few necessities which we really already have. The town of Bridgewater is a good example. They have everything you need but have kept that small time feel. The town recently built an ice skating rink and uses that facility for farmers markets, etc. An indoor pool and rec center would be amazing.</td>
</tr>
<tr>
<td>9/7/2017</td>
<td>NEED MORE ACTIVITIES FOR YOUNG PEOPLE. THEATER. BOWLING. SKATING. SWIMMING</td>
</tr>
<tr>
<td>9/7/2017</td>
<td>Encourage much more community engagement... formal and informal meetings/activities with the express mission to bring long-term residents and newcomers together to make our county better. Long-timers often feel adrift. Newcomers often feel put off at once.</td>
</tr>
<tr>
<td>1/0/1900</td>
<td>Clean up blighted businesses and introduce service roads</td>
</tr>
<tr>
<td>10/2/2017</td>
<td>Stop the speeding on 29, 33, and local streets. Tear down or clean up the dilapidated buildings and Exxon station at the 33-29 intersection and for a mile or so north and south of it. Get rid of the used-car dealers and the junky antique stores. Get more decent family dining restaurants and move the Taco Bell, Burger King, and the like to less visible locations with signs</td>
</tr>
<tr>
<td>10/2/2017</td>
<td>more walking and bike trails for active retirees in open grassy landscaped areas.</td>
</tr>
<tr>
<td>10/2/2017</td>
<td>Need to put in a good road structure to avoid the failure of Albemarle County. Interchanges at Mathews Mill, Rt 29/33. Extend Stonendge road south and connect behind Bank of America. On the east side, connect Commerce drive to Hasting to Moore Rd. This would provide excellent access roads to businesses. Future would be to put in underpasses at Bank of America and the Lowes light to create a logo. Get a good road structure first and then let the businesses build around that.</td>
</tr>
<tr>
<td>10/1/2017</td>
<td>I think just tightening up 29 with turning lanes and or frontage roads would help flow of traffic and be beneficial for business. Frontage roads would help with controlling crossing points to eliminate crossings every block. It would be interesting to have a bike route that connected to eville as an option for commuting when weather cooperated. I think ruckersville area will continue to grow naturally as cville expands northward.</td>
</tr>
<tr>
<td>9/29/2017</td>
<td>Have the traffic light at 607 and 29 be in sync with the lights on 29 in the rush hour of the morning and evening. I have sat at these lights and they turn 3 times before I can get to them.</td>
</tr>
<tr>
<td>9/24/2017</td>
<td>Regarding transportation, Greene County transit buses/vans are rarely filled, therefore additional public transportation is not needed. Our unemployment seems not to be an issue, yet higher paying jobs in the county would be good. We do need safe affordable housing. We should leverage our proximity to the Rt. 33 Skyline Dr. entrance and think about what those who visit that park would need to have a great vacation/visit. Good restaurants, equipment for a week long camping trip, etc. I suggest visiting towns like Custer, SD, Gatlinburg, TN to see how they incorporated the natural beauty with commerce.</td>
</tr>
<tr>
<td>Date</td>
<td>Suggestion</td>
</tr>
<tr>
<td>------------</td>
<td>----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>9/21/2017</td>
<td>Fixing traffic flow at Routes 33 and 29 intersection - especially both directions onto Route 29 from Route 33; Cracker Barrel, Chick-fil-A, Salad Works franchise, Olive Garden; a “Salad Works” franchise (Salad Works offers healthy food choices - needed in Greene County to help with obesity problem in Greene County); better Bank of America hours (to consider to be open early or late one day a week); roller skating rink; skateboard park; dog park; bike lanes; widening of side roads to allow for bike paths; sidewalks. Separately VERY thankful for the new Greene County treasure (I believe she’s been in office now for several years) -- love the streamlined look of the tax bills -- thank you for using common sense in creating them.</td>
</tr>
<tr>
<td>9/15/2017</td>
<td>Parallel roads</td>
</tr>
<tr>
<td>9/14/2017</td>
<td>Remove the blight on the northeast corner of 29 and 33. Widen the 29 crossover heading west. Cars cross the yellow line to pass stopped cars waiting at the light. I'm surprised there aren't head on collisions on a regular basis.</td>
</tr>
<tr>
<td>9/14/2017</td>
<td>Improving roadways and easing traffic in anyway possible. Many travel the 29 corridor from Northern Va to jobs in Charlottesville. Improving roadways and other infrastructure such as stronger more efficient power girds, water and sewer connections would allow Ruckersville develop into a solid growing community</td>
</tr>
<tr>
<td>9/13/2017</td>
<td>Sidewalks, bike paths, safe crossing points on 29.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Making left turns from 33 into 29 always seems like there's not enough space for both directions to turn. Would love to see that intersection change, and tear down that horrid old gas station!</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Expand route 29 to 3 lanes all the way to route 33! Traffic gets backed up to/from the airport to sheez every day at all of the stoplights. The recent widen projects just pushed all of the traffic delays north of the airport.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>mountain bike trails that connect to preddy creek in albemarle AND, bike trails along 29 for possible commuting to charlottesville and connecting to the newly built trail on the side of 29 where they widened to 3 lanes.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>A park and ride with bus access to downtown Charlottesville would make Greene County, especially Ruckerville, the dream park and ride location.</td>
</tr>
<tr>
<td>9/12/2017</td>
<td>Fixing traffic flow at Routes 33 and 29 intersection - especially both directions onto Route 29 from Route 33; Cracker Barrel, Chick-fil-A, Salad Works franchise, Olive Garden; a “Salad Works” franchise (Salad Works offers healthy food choices - needed in Greene County to help with obesity problem in Greene County); better Bank of America hours (to consider to be open early or late one day a week); roller skating rink; skateboard park; dog park; bike lanes; widening of side roads to allow for bike paths; sidewalks. </tr>
<tr>
<td>9/12/2017</td>
<td>Real push for travelers to stop or even just come here. Start with nationally recognized branded businesses that will in turn promote further growth. Get as much local traffic off US29 as possible with parallel roads.</td>
</tr>
<tr>
<td>9/11/2017</td>
<td>Sidewalks along route 29, cross walks at red lights. Remove the closed/unsightly old gas station at the intersection of Rt 29 and Rt 33 (across from the Antique stores). This could be cleared and possibly paved as additional parking or a farmer's market meeting place, or a park and ride location.</td>
</tr>
<tr>
<td>9/8/2017</td>
<td>Lower speed limit along 29 and 33 in Rville and embrace it.</td>
</tr>
<tr>
<td>9/7/2017</td>
<td>Real push for travelers to stop or even just come here. Start with nationally recognized branded businesses that will in turn promote further growth. Get as much local traffic off US29 as possible with parallel roads.</td>
</tr>
<tr>
<td>10/3/2017</td>
<td>I am interested in the following: 1. When is the road work to expand Spotwood Trail to a 4-lane road to begin, and 2. Who do I contact to see about getting a &quot;blind driveway&quot; sign installed? Please email me at <a href="mailto:scott.turbaner@aol.com">scott.turbaner@aol.com</a></td>
</tr>
<tr>
<td>10/3/2017</td>
<td>29-33 area congestion and U-turn rate along 29 is out of control. Lots of pedestrians running across 29 at Exxon to Wal-mart. Reduce speed limit along corridor.</td>
</tr>
<tr>
<td>10/3/2017</td>
<td>Some narrow 35’ road easements have to be increased to 50’ to allow for bike lane/shoulder.</td>
</tr>
<tr>
<td>9/27/2017</td>
<td>On Rt 29 going towards and away from Rt 33 intersection, both North and South sides, there seems to be so many traffic signs to read, but not all those signs are of equal importance. Can any be removed? For example I’ve observed numerous “No Parking” signs on the grass areas next to the turning lanes. Maybe paint something on the ground for that particular lane (turn lane only?) and remove some of those signs. It’s obvious to me that those lanes are meant for moving traffic — why would anyone think they could park in those areas? Another suggestion — have the stores and restaurants that “look” at Rt 29 (North and South) be responsible for clearing the trash that accumulates on and near their property (Burger Chef is one example). Also the median strips (again on Rts 29 and 33) look bad all the time. Can someone destroy the weeds and clean up the debris that lays next to them? It’s very unsightly. Please consider doing that in general, maybe 3-4 times a year; it would certainly improve the general look of things as they are now. One last thing — what going on with the “building” on the corner of Rt 29 North and 33, kind of in front of CVS? Maybe you’ve gotten used to looking at it, but in my almost 11 years of driving by it, it continues to be an eyesore. The glass windows are broken, there’s weeds and other stuff growing inside, and the structure appears to be falling over a bit. In addition to guests commenting on the look of it, surely its condition has reached the status of being a safety hazard to the public in general. I’m sincere when I suggest that doing some maintenance now on some of these areas that everyone sees, can begin to show that Ruckersville does care about its future and is starting to do something about it now.</td>
</tr>
<tr>
<td>9/25/2017</td>
<td>Cleaning up around R1 29 is most important. It is an eyesore to the &quot;Gateway to the Blue Ridge&quot;.</td>
</tr>
<tr>
<td>9/24/2017</td>
<td>Remove the unsightly, dilapidated buildings and structures along Route 29 and Route 33. All blight should be addressed and eliminated. It is embarrassing when we ask guests to visit.</td>
</tr>
<tr>
<td>9/23/2017</td>
<td>Clean up, beautify 29x33.</td>
</tr>
<tr>
<td>9/23/2017</td>
<td>Clean up area between Terrace Green apartments and the 29/33 intersection, movie theatre, and demolish the abandoned building on the corner of 29/33 by CVS to make room for a Starbucks.</td>
</tr>
<tr>
<td>9/23/2017</td>
<td>Clean up the mess along route 29 and you drive south coming from Northern Virginia before you get to Route 33. That is a mess. Finish the shopping area where Walmart and Lowes is and make that a little shopping mall area. Get rid of the old gas station at the corner of route 29 and route 33. Put some nice new buildings and businesses there. The whole area along route 29 going through Ruckersville is not inviting and looks “unkempt and uncontrolled”.</td>
</tr>
<tr>
<td>9/22/2017</td>
<td>Clean up what you have and THEN create a place where people want to stop.</td>
</tr>
<tr>
<td>9/22/2017</td>
<td>The commercial buildings along 33A-29 look tacky. Some should be knocked down or remodeled to present a better aesthetic. More restaurants (not another Mexican restaurant please!) need to be opened. Some better known chain restaurants would draw a lot of customers (Bob Evans, Starbucks, a good steak house, etc.) More choices for grocery stores. Develop assisted living facility in Four Seasons.</td>
</tr>
</tbody>
</table>
Short term wins: Get the median under control. Mow it every two weeks and landscape it. Clear off the property known as, "Mr. B's" either through blight ordinance or imminent domain. Use it to widen the intersection. Require special use permits for utility upgrades and push them back off of the 29 corridor. Longer term wins: Poll local businesses to determine what would motivate them to maintain their properties. Pie in the Sky: bring light manufacturing to Ruckersville.

Clean up the median on 29, keeping the grass cut and planting more trees. Bring greater discipline in signage and building maintenance so it looks like a community.

9/14/2017

The 29 corridor is very unappealing. We would like to see more options for shopping, restaurants and entertainment for the professional family in Greene as well as ruckersville. We have a beautiful community much more picturesque then most...It seems a shame we are allowing all that revenue go to other communities...Standardsville would be a beautiful place to put small markets, descant restaurants. Perhaps a Amphitheatre...We have such a beautiful community and it seems were wasting it's potential.

9/13/2017

General beautification of 29 through ruckersville. There are empty buildings and unsightly signage. Need to look at success of Nelson county in getting so many breweries.

9/12/2017

Create less havoc on Rt 29 N and S. To beautify put the local VDOT to work and mow the medians and keep the roadways clear. Ruckersville is considered a dangerous traffic area to me.

9/12/2017

Route 29 streetscape, business planning.

9/12/2017

Landscaping curbing upgrade exterior of existing buildings

Ruckersville is an eye sore even to people driving by. There are signs on every stop sign and every property in Ruckersville. I think passing a sign ordinance to cut down on the number of tacky signs would help a lot. It just looks junky.

9/7/2017

Change signage policy to allow off-site signs for our businesses (the VDOT TODS signs are a ripoff for small business).

Develop a master plan with input from local business leaders and then execute it. Move forward with the new reservoir to support smart growth and make the area more inviting to larger businesses.

9/10/2017

Protect Route 29. Out of the top 3 employers in Greene County. Greene County #1 School Board County of Greene #3 Powerlines look terrible.

10/3/2017

Hiking trails, educational opportunities. A community center.

10/9/2017

Some kind of small meeting place (park? trails?) in Ruckersville. It seems like all of that is in Stanardsville but the people are in Ruckersville.

9/20/2017

Hiking and mountain biking trails.

9/17/2017

A park with a pond/lake, grass areas for family time and trails around the park

9/12/2017

Promote the western mountain area.

9/12/2017

Develop our parks, add an additional park, better parks and recreation. More opportunities for teens and kids, more nice homes and shops. Public pool, spraygrounds, secure feeling park or not so isolated.

10/2/2017

Make it affordable and taxes low.

10/1/2017

Hiking and walking Trail opportunities

Lower property taxes. Offer tax incentives to private investors in order to encourage business to locate here. Set up special zones with lower or no capital gain or income taxes to encourage private investment.

9/20/2017

Eliminate business tax for businesses making less than $50,000 per year

9/20/2017

lower taxes

9/20/2017

Lower property taxes - Plant more trees in median strip between north and south lanes.

9/12/2017

Lower property taxes. Give funding to fire-departments based on concentration of people, homes, and businesses. Funding each of the 3 department the same when dyke with is low population density doesn't makes sense espcially with the way Ruckersville has grown so much. A fire training center so we can keep Fire services volunteer is obviously needed.

10/3/2017

Present property tax rate is deficient - to be raised after new development is in place

10/3/2017

No ideas at this time

10/3/2017

Keeping us rural. Moved to the area to be peaceful, quiet not for the busy Charlottesville area

10/2/2017

Unknown

Ruckersville is a great place to live with lower taxes than surrounding areas making it affordable if people moving in want more services from the county then they should have looked at this before deciding to live here as this would raise our taxes. Greene County is a great place and we have loved it since we moved here over 2-years ago it is a friendly family atmosphere. I would like to see new home developments to have a good plan and cookie cutter with no standards to hold up that hurt existing homeowners nearby with lower home value due to a cookie cutter approach.

9/26/2017

improved action by board of supervisors.

9/25/2017

Less people ask you if you’re from around here! What the hell does it matter where you come from?

9/22/2017

We moved here for the rural atmosphere and country living.

9/15/2017

Please see my previous comment concerning breweries. Thanks for the opportunity to take this survey.

9/14/2017

Leave it as a rural area not a crap house on top of house

9/14/2017

Create a satellite rescue squad site in Ruckersville which could house a satellite sheriff's office.

9/14/2017

A More Patriotic Stick To It Community ONE for All - All for ONE

9/14/2017

I think it already is

9/13/2017

Better law enforcement in the area to cut criminals. Food places are closing too early and you have to go to Charlottesville to eat.

9/12/2017

It's fine as it is. Don't change it!

9/12/2017

Getting information out is of most importance. We rely on Facebook communications like "The Vine" "Greene County Parents Survival" and others. But none are initiated by Greene County itself.

9/12/2017

I am happy the way it is.

9/12/2017

The questions asked in this survey are all items I would suggest. Great job!

9/11/2017

Keep out the developers.

9/8/2017

Strength: Location (proximity to Cville, D.C., National Park, etc.). Weaknesses: Presentation- how it looks when driving through, Opportunities: Significant undeveloped property that is highly visible, Threat: Over regulation (excessive costs)

9/8/2017

S: Growing population with median income, W: Perception as a place to pass through rather than stop (treat as a destination), O: High density area w/throughfares, T: Sufficient H2O for future growth?

9/8/2017

S: Utility infrastructure primarily in place, corridors defined, W: Existing clutter discourages new development, RI. 29 is difficult for east/west crossovers.

9/8/2017

S: Location/Rt. 29, W: Water/sewer

9/8/2017

S: willing to be forward thinking, W: lack of power, O: county to get more money, T: surrounding counties

This section provides an overview of a basic audit of the Ruckersville Area, as it applies to the Greene County Zoning Ordinance.
Purpose
The purpose of this section is to provide an overview of the Greene County Code, as it applies to the Ruckersville study area. This audit of zoning requirements does not represent a thorough analysis of all code sections but identifies areas for further study.

Function
This code audit should serve as a resource for developing a scope of work for recommendation LU-1: Comprehensive Zoning Audit, which includes recommendations ED-4 and LU-3. The outcomes of those efforts will serve as a detailed plan for amending the code, as needed.

Overview
There are twelve zoning districts in the Greene County Zoning Code. Eight of those districts (shown in bold font) are within the Ruckersville study area:

- Conservation, C-1
- Agricultural, A-1
- Residential (Single Family Dwelling Units), R-1
- Residential (Multiple Family Dwelling Units), R-2
- Senior Residential, SR
- Planned Unit Development, PUD
- Business (Restricted), B-1
- Business (General), B-2
- Business (Highway), B-3
- Industrial (Limited), M-1
- Industrial (General), M-2
- Flood Plain (General), FP

General Conclusions
Use Matrix
Explore development of a zoning use matrix for each zoning district, to help create a clearer and user-friendly ordinance.

Simplified Uses
Throughout the ordinance, zoning uses may be overly detailed, such as vending machine sales and service or boat building, whereas many uses include stipulations on size of intensity. A final code audit should explore ways to simplify listed uses, where stipulations are detailed in the definitions section, if needed.
Design Overlays
Throughout the Ruckersville Area Planning process, public comments centered on a more attractive, town-like environment. Consequently, the final code audit should explore some kind of design overlay district, especially over the US 29 corridor. Development of design guidelines would likely be a separate County-lead effort.

Expanded Landscape Standards
To implement the community vision for beautification in the study area, the final code audit should explore development of additional landscaping requirements.

Commercial and Industrial Overlay
As is outlined in recommendation ED-4, there should be exploration of overlay districts that could encourage economic development options throughout the study area.

Clarity on Discretionary Actions
Several sections of the zoning code state that the zoning administrator may require certain site features or improvements, such as additional screening. In many cases, there is no guidance on when and how these features would be appropriate. These code sections can also place political pressure on staff to require and ignore actual site needs. The final code audit should explore ways to bring more certainty and consistency to discretionary actions.

Use Definitions
Not all uses listed under zoning districts are defined in the definitions section. The County should reexamine the definitions section and ensure that all zoning uses are defined.

Agricultural, A-1
Lot Size
For a rural district, a two-acre minimum lot size may allow significant residential development in the non-development areas of Greene County. Since there was consistent public feedback to preserve rural character, a final code audit should explore options for accomplishing that goal, perhaps with larger minimum lot sizes.

Residential, R-1 & R-2
Residential R-3
While the Residential R-2 district allows for multifamily with a conditional use permit, the County could explore options for a R-3 zoning district. A new district could provide more focus and detail on making desirable multi-family developments.

Agriculture in R-2
Since Residential R-2 is the highest intensity residential district, the County could discuss whether some uses, such as Agriculture, are appropriate for this section of the code.
Active Recreation
The existing code calls for active recreational uses, in section 6-6-2, but there is little detail on what those uses would entail. The final code audit should explore options for specifying what recreational amenities apply and in what quantities.

Tot Lots
Throughout the planning process, the public called for more recreational opportunities for children. The County could explore options for requiring tot lots or playgrounds for residential developments over a specified size.

Senior Residential, SR
Alternatives
A new PUD ordinance or Residential District could accomplish the same objectives of the SR District.

Planned Unit Developments
Greater Densities
For a district that is intended to allow for greater flexibility and a town-like environment, a maximum density of 8 dwelling units per acre may not accomplish the stated goal. Given that the Board of Supervisors must approve any PUD request, the County should explore whether higher densities would be appropriate.

Mixture of Uses
For a district that is intended to allow for greater flexibility and a town-like environment, there do not appear to be requirements or incentives for mixed-use developments. The County could explore ways to foster more mixed-use and town-like communities under PUDs.

Business B-1, B-2 and B-3
Appropriate Uses
The County could reexamine why some uses are appropriate in one district but not others.

Access Management
Consistent with recommendation T-5, the County could explore requirements for shared access and connections between adjacent parcels, to help traffic flow along major corridors.

Industrial M-1 and M-2
Appropriate Uses
The industrial M-2 district is intended for uses with low to moderate environmental impacts, yet it allows uses such as coal yards. The County could reexamine what uses are appropriate for the two industrial districts and whether a new district could better address desired industrial uses.

Outdated Language
There are sections of the code with outdated language, such as section 12-3-1, which regulates setbacks for telephone booths. The County could reexamine and streamline the code, by removing language that no longer applies.
Building Height
The Industrial M-2 district allows for 60-foot building heights, by-right, yet this district also includes waivers from the height restrictions from the Board of Supervisors. The County could reexamine this and other sections to determine appropriateness.
